# Report for 2ⁿᵈ June 2020

Tasks Performed :

- Worked on network analysis on the individual threads and building the network with the node as the starting point of thread.

- **This the network of the thread with 13 edges and the node of the discussion thread is "DanielOakfield"**
- **I need to manually multiply the polarization for the calculating the edge homogenity**

Difficulties Faced : - **Need to figure how to deal with the calculation of the edge homogeneity for the large set of edges**

Follow Up Work:- To work on calculation of the edge homogeneity and plotting the results
